

The IDAD Fund (formerly The Structured Product Fund) Sterling Ordinary Fund Factsheet - July 2018

Investment Aims

The IDAD Fund plc is intended to meet the needs of investors seeking medium to long-term capital growth who are willing to accept a moderate level of risk. The target for the Fund is to achieve annualised returns between 5% and 15%. Higher returns on an investment cannot normally be achieved without increased risks to capital, or a reduced probability of receiving the returns. The Fund manages the risks to capital in a number of ways, as well as working to enhance the probability of delivering the targeted returns.

Investment Manager Commentary

July was a good month for global equity markets as worries over escalating trade tariffs faded for the moment and attention returned to the healthy economy and strong corporate earnings. By and large these have exceeded analyst expectations, but a disappointing growth forecast from Facebook pulled the rug from technology stocks, which were subjected to a heavy dose of profit taking. Nevertheless, the IDAD GBP enjoyed an exceptional month rising 3.7%, comfortably outperforming the sector average and most global indices.

For some time we have been saying that the portfolio contained some notes with high levels of imbedded value and in July some of the upside potential was realised, with our Natixis Triple Index classic maturing with growth of 11.8% over the month. We would hope to report other such success stories over the coming months.

An escalating trade war between the US and primarily China could yet scupper the upbeat mood in markets, but underlying fundamentals remain strong. The US economy picked up pace in the second quarter recording GDP growth over 4%. Corporate earnings across the globe have once more surprised to the upside, with growth forecasts generally rising above expectation. This bull market is getting long in the tooth but to our minds it has further to run and we are positioned accordingly.
