

# The IDAD Fund (formerly The Structured Product Fund) Sterling Ordinary Fund Factsheet - May 2019

## Investment Aims

The IDAD Fund plc is intended to meet the needs of investors seeking medium to long-term capital growth who are willing to accept a moderate level of risk. The target for the Fund is to achieve annualised returns between 5% and 15%. Higher returns on an investment cannot normally be achieved without increased risks to capital, or a reduced probability of receiving the returns. The Fund manages the risks to capital in a number of ways, as well as working to enhance the probability of delivering the targeted returns.

## Investment Manager Commentary

The trade war escalated in May as the US pulled back from discussions with the Chinese and introduced tariffs on a wide basket of goods. China are yet to play their hand, but investors expect retaliatory measures and market sentiment has turned bearish. Global equity markets retreated, bonds rallied, oil tumbled and Gold made a move to the upside. Against this difficult backdrop The IDAD Fund GBP fell -4.50% but it remains significantly up for the year.

For the moment we are not calling an end to the bull market but are nervous that global trade tensions could get worse before they get better and have not deployed cash that has built up in the portfolio. Trump seems to be rallying his voter base by attacking China, Mexico and Iran. How long this will last we do not know, but we suspect his concern for a strong economy and with one eye on stock market levels, he will ease back at some stage, no doubt claiming victory. Further out we still remain positive on equities that should flourish in a low inflation, low interest rate environment and The IDAD Fund is well positioned to benefit from this outlook.
