

The IDAD Fund (formerly The Structured Product Fund) US Dollar Ordinary Fund Factsheet - November 2019

Investment Aims

The IDAD Fund Plc is intended to meet the needs of investors seeking medium to long-term capital growth who are willing to accept a moderate level of risk. The target for the Fund is to achieve annualised returns between 5% and 15%. Higher returns on an investment cannot normally be achieved without increased risks to capital, or a reduced probability of receiving the returns. The Fund manages the risks to capital in a number of ways, as well as working to enhance the probability of delivering the targeted returns.

Investment Manager Commentary

The IDAD USD Fund enjoyed another exceptional month in November rising 2.00%. This was achieved through strong performance across the board from our notes with some maturing and others benefitting from stable equity markets. In addition, our new technology exposure through delta one ETFs linked to Robotics and Cyber Security also performed strongly, as there were signs that global manufacturing activity had begun to tick up.

After an exceptional year, it is worth posing the question... can this continue next year? To our minds and after thorough inspection of our holdings, the answer is 'most definitely'. The backdrop is favourable and recently we have become more optimistic in the outlook for risk assets. The combination of a pick-up in global manufacturing set against easy monetary policy, looks a very positive environment for risk assets. Assuming Trump doesn't want a flare up in trade tensions ahead of the elections next year, we hope for a Phase 1 trade agreement to be reached this month which could remove an overhang to further gains.

Drilling through the portfolio we have some notes capable of making market plus gains, particularly our Natixis Asian note and others that could well call at significantly higher levels next year. We thank our investors for their continued support.
