FUND COMMENTARY

January proved to be a choppy month for equity markets where an initial surge at the beginning of the year soon faltered, as investors digested the grim realities of a world where economic activity remains suppressed by the resurgent Coronavirus. The initial optimism was in part sparked by the Democrats regaining marginal control of the US Senate and the possibility of even more Fiscal stimulus from Joe Biden's party. That may yet come, but rather than being the icing on top of an economic growth cake, it is becoming increasingly apparent that it is more of a necessity as the nascent recovery is faltering under the weight of new infections.

The 8AM Multi Strategy Portfolio IV Fund shadowed the broader movement in the markets to some degree and finished the month 0.55%. The stand-out of the holdings was the Baillie Gifford Positive change, our Global Fund pick which rose +7.67%. One change was made within the active selection, with FP UK Microcap Growth replacing the ASI UK Smaller companies pick and we are hopeful that this smaller and nimbler fund can generate better returns.

Whilst the investment community at large is expecting 2021 market leadership to come from the cyclical and recovery sectors, as the arrival of the vaccine will herald a return to normal, we are not so sure. Our fund picks based on strong 2020 performance and positive momentum continue to favour funds with more growth characteristics. If this trend changes, we are confident that our fund selection engine will identify the move and adjust accordingly, until then we sense the opportunity to build on the robust performance generated since the fund restructuring which took place in June last year.

SUITABILITY

An investor who is comfortable with holding a significant proportion of their portfolio in higher risk investments in order to have the opportunity for a greater investment return.

An investor who is prepared to accept investment losses in the short term in order to achieve potentially greater investment returns over the longer term. The portfolio will be subject to significant fluctuations in value.

RISK WARNINGS

The EF 8AM Investment Funds, are subject to normal stock market fluctuations and other risks inherent in such investments. The value of your investment and the income derived from it can go down as well as up, and you may not get back the money that you have invested. Investments in overseas equities may be affected by changes in exchange rates, which could cause the value of your investment to increase or diminish. Capital appreciation in the early years will be adversely affected by Initial Charges, so you should regard your investment as medium to long term. Past performance is not a guide to future performance. Every effort is taken to ensure the accuracy of this data, but no warranties are given.
